Age Group 5 - 11

Science Stories - 1 x 15 minute programme

This programme takes a look at the following topics in a farmyard setting: living things, growing and changing, and growing plants.

Science Tube - 6 x 15 minute programmes

- **Light Show** - This programme takes an in-depth look at the properties of light.
- **Action!** - This programme is looking at what forces are, what they do and how they can be measured.
- **Bugs** - This episode delves into the world of micro-organisms.
- **How Stuff Changes** - This programme explores the non-reversible changes that result in the formation of new materials.
- **What Stuff Does** - This fascinating programme explores the properties and uses of the diverse materials that surround us.
- **Green World** - This programme shows how plants adapt to their environment and how they are essential to our lives.

Age Group 11 - 16

How Science Works - 2 x 15 minute programmes

- **Chasing the Wind** - This programme examines the changing climate and what can be done about it.
- **Bad Vibes** - This programme follows acoustic engineer Trevor Cox's quest to discover the worst sound in the world.

The Issue - 3 x 15 minute programmes

- **Fighting HIV** - This programme follows HIV positive Clint Walkers' personal journey through therapy and treatment.
- **Cancer and the Genome** - This programme follows Sarah Walsh, a young woman living with melanoma. It examines what is cancer and why it happens.
- **Stem Cell Research** - This programme follows Stephen Cuff, a sufferer of Parkinsons Disease. It examines the use of stem cell therapy for its treatment and the ethical debate surrounding it.

Periodic Table: Ferocious Elements - 1 x 15 minute programme

There are more than 100 elements in our universe, 81 of which are metals. This programme uses the periodic table to explore some of these elements and discover why some are more reactive than others.

Big Screen Science - 3 x 15 minute programmes

- **Stem Cell Controversy** - Craig McMillan, a wheelchair user, investigates the moral and ethical dilemmas of stem cell therapy and questions whether it will ultimately affect his own disability.
- **The Perry Pigger Show** - This animated film tackles the complex subject of xenotransplantation using the format of a popular chat show hosted by a cartoon character named Perry Pigger. Using a cartoon character and a familiar TV format helps make a difficult topic fun and accessible.
- **Law of Averages** - This programme explores the issue of kidney transplantation in a short drama made and acted by a group of students from Barrhead School near Glasgow.
